Data Mining Django Python Software Architecture Web Scraping \$9 / hr (Avg Bid) \$9 / hr Avg Bid 26 bids Bid now

39Title: I am looking for someone continue a Cloud Application using C# & AWS. (READ DESCRIPTION BEFORE APPLYING!!) .

Description: Please have a read of the documents I have attached and let me know if you are able to. Please note that you will also have to create a greedy algorithm for this project. I have pseudocode I provided to help you with that. I have shared a DLL file for the client-side functions that comes from AT1. That only contains the functions from AT1. You'd still need to implement some additional client-side functions as well for this project. The Client's only purpose is to retrieve the CFF files then send them to our AWS instances depending on the work load. Then the client returns the results. So no actual computing is happening on the client side. So the allocations from AT1 are now being calculated on the cloud servers and sent back to the client. Amazon Web Services C# Programming \$195 (Avg Bid) \$195 Avg Bid 8 bids Bid now
